

# DOGCOIN

**WHITE PAPER v1.2 // MARCH 2022**

# ABOUT

DogCoin is a hyperdeflationary reflection token, which rewards investors for holding tokens in its native Token **\$WOOF**.

Our contract is fully renounced, we have low tax on buys and sells, and we are community-owned and managed. We have a few admins to keep things running smoothly, but every decision is made as a community.

# HYPERDEFLATIONARY UTILITY TOKEN EXPLAINED

The DogCoin token works with different properties that raise the price just by simply trading. The goal is to provide a stable price floor by using different protocols in its contract. Combined with the burn wallet that receives reflections the circulating supply shrinks with every transaction making it hyperdeflationary.

## Those protocols are:

- **Auto Liquidity protocol**  
1% of transaction goes automatically into the liquidity pool
- **Tax protocol**  
4% of every buy & sell will be credited to the token holders in **\$WOOF**

## HOW DOES THE BURN WALLET WORK?

20% of the supply will be transferred to the burn wallet which means it is taken out of the circulating supply right at launch. This wallet will also receive reflections from the tax protocol that distributes tokens from transactions shrinking the circulating supply in the process.

# TOKENOMICS

- Symbol: **WOOF**
- Total supply: **10,000,000,000,000,000 WOOF**
- Burn: **20% of initial supply burned**
- Tax: **5% Tax on buys / 5% Tax on sells**
- Reflections: **4% reflections to holders**
- LP: **1% from each transaction sent to Liquidity**
- Ownership: **RENOUNCED**
- Liquidity: **LOCKED**
